JSCAPE Secure FTP Server Crack+ Full Product Key Free Download [32|64bit]

JSCAPE Secure FTP Server is a complete solution for secure data exchange with trading partners and rapid automation of file transfer processes. By employing a server-side web based approach, JSCAPE Secure FTP Server simplifies the process of securely exchanging data with trading partners and automation of file transfer processes. Using a Java based API, JSCAPE Secure FTP Server can be easily integrated within other business applications without the need for specialized software development. Here are some key features of JSCAPE Secure FTP Server:

- ☑ Highly Secure - The use of high-grade OpenPGP and SSL encryption technologies ensures the highest level of data protection possible.
- ☑ Fulfills HIPAA and Sarbanes-Oxley Data Protection Requirements - Designed to comply with HIPAA and Sarbanes-Oxley requirements, JSCAPE Secure FTP Server ensures sensitive data remains private during transit and at rest.
- ☑ Multiple Protocol Support - Support for FTP, FTPS (FTP over SSL), SFTP (FTP over SSH), HTTPS and HTTP protocols means you can exchange data with your customers, regardless of their file transfer requirements.
- ☑ Web Based File Transfer Client - Using the integrated web based client, users do not have to worry about strict internal firewall policies as most organizations do not restrict web based traffic.
- ☑ Data Protection - Your sensitive data is protected during transit and at rest using high-grade OpenPGP and SSL encryption technologies. This is critical for many companies who are now subject to HIPAA and Sarbanes-Oxley data protection requirements.
- ☑ Triggers - Using triggers you can quickly automate business processes based on events and conditions. For example, whenever a file is received by a customer you may wish to automatically compress that file and then forward it via email to the corresponding account representative for further processing.
- ☑ LDAP, Active Directory and Relational Database Authentication ☑ Authenticate users against existing LDAP, Active Directory or relational database servers. This greatly simplifies the integration process, especially in organizations with a large number of users.
- ☑ Action API - Using triggers you can define one or more actions to be executed in response to matching events and event conditions. More than 35 actions are included allowing you to do everything from compress files, OpenPGP encrypt files, send emails and more. While this may be enough for most organizations, the Action API is a Java based API that allows you to define your

JSCAPE Secure FTP Server With Key [Mac/Win]

A Key Macro is a pre-defined "key" that may be used for authenticated data exchange. For example, it may be used to pre-authenticate the contents of an email message before emailing it. JSCAPE KeyMacro is a standard XML key exchange format which requires a KeyMacro or Keymacro-macro (symmetric key, or key-level) and a KeyMacro or Keymacro-key (asymmetric key, or key-level) to encrypt or decrypt data. The JSCAPE KeyMacro-key must be shared by the two parties. It is recommended that the KeyMacro-key is only shared at the enterprise level. This allows you to centrally manage a single key. The format of a KeyMacro is as follows: 81e310abff
