The Access Development Kit (ADK) is a set of tools for Microsoft Access that allow the development of Access databases and/or add-on applications that work with Access databases and/or run in Windows. The Access AutoClass macro language is a hybrid of VBA and SQL. The Access Macro IDE is an add-on program that allows users to edit and execute macros for Access and Office. Interface AutoCAD offers various user interfaces for modelers, users and administrators. Some of these include the

Windows desktop, Microsoft Windows OS, web-based applications, command-line, web browser, AutoCAD LT and AutoCAD Web Connect.

Windows AutoCAD offers three windows interfaces on Windows: Windows provides multiple user interfaces, including the main user interface on the top left, the main program window on the top right, toolbars on the bottom left, and multiple windows for various views of the current drawing. The main AutoCAD program window is in a "split mode" that displays a toolbar to the right and the main drawing area to the left. Viewing options can be adjusted with the View menu, including display options such as the ability to display tabs, a dock, magnifying glass or hatching. Drawing area windows can be

displayed in "full" or "split" mode. In full mode, the drawing area occupies the entire window and the toolbar and other interface elements are hidden. In split mode, the drawing area is displayed in the upper left portion of the window, while the lower portion of the window contains the toolbar, documentation, menus and other interface elements. The "Split" drawing area window can be converted into "full" mode by pressing the "B" key. This change is persistent until the "B" key is pressed again to return to split mode. Windows provides a right-click menu that contains shortcut menu items to access numerous options in the drawing environment, including the ability to start a new drawing or open an existing drawing. In Windows

versions starting with AutoCAD 2007, the "Toggle Display Options" button on the toolbars can be used to toggle between the default display settings and display settings adjusted using the Options dialog box. Since AutoCAD 2013, the "Close All Views" button in the top right of the main drawing window can be used to close all views of the current drawing. The button will be grayed out in cases where there are unsaved views. Auto 5b5f913d15
