edition Spoiler Abbey - for opening and for one of the best scene in this movie you are able to hack open the soldiers with your sword. Death - best death, although it's the last scene and got a little boring, you are able to use one of the strongest cyber bullets (energy shot, you are able to use it three times and you have 10 back-up shots) Bankers - best death of all cyber soldiers, the final scene in which you let your attacker go because of this, and as it says in you question on the forum you have a teleport to a simpler castle. You asked for weaknesses, I would say that your cyber soldier didn't noticed you are so close to him, also you have the advantage of higher strength (all members of the first squadron of course) and I believe that also one of your petreus killed him, Â´ please correct me if I'm wrong. Link to the full thread: [FAQ Thread on GOG.com Spoiler](#) - See the FAQ about hacking and beating the Cyber-soldiers to learn how to hack them. - You can unlock some of the cyber soldiers by recruiting a miniboss. - When doing a save on your harddrive, use the symlink `cpw/SaveData/Save.zip` to replace the old save with a new one. - Keep your shield up and wait for the first cyber projectiles to get to you before you move, cycle through three seconds of one bar. If you manage to block the first one you can't get hit by next two, but if you have forgotten about it, you will get hit for three bars. - Block the first couple of projectiles with your shield then grab the Cyber-sword and swing it with full strength. This can be extremely effective, and it takes it out of the main player's range. Just wait for a couple of moments and the weapon will automatically attack, killing them without any effort. - Special attacks work for all enemies: - Power-Ups and Ammo: - Each weapon is accompanied by different ammo types

(cyber, sword, atom, electromagnetic, etc.): - An Artemis city is needed to play your first mission, so your post isn't a viable route to success at the moment. Do some research and see if there is a way to play these missions without an Artemis city. Also see the topic titled "No subjects for missions without Artemis?"
