WD Spindown or Stop Utility allows you to easily turn off or stop a WD external hard drive by pressing a button on the front of the drive. WD Spindown or Stop Utility is compatible with all Western Digital external hard drives except for the Media Center and the Dual-option Backup drives. You can connect the drive to your PC and run the tool to control the behavior of the drive. Take WD Spindown or Stop Utility for a spin to see how useful it can actually be for you! How to use WD Spindown or Stop Utility: Launch the utility and select the drive you want to use. The drive will then be connected and be ready to use. This utility can be very useful in reducing power consumption when the drive is not in use. For example, you may want to save power when you go to sleep or turn off the PC. You can also turn off the drive to make sure it doesn't run up the battery. You can also leave the drive turned off to conserve power on the battery if you will be away from the computer for an extended period of time. Windows XP, Vista, 7, 8, 10 Notes: This utility will not work with backup drives or the Media Center. Please make sure that you are turning off a WD external hard drive that is connected to your PC and you need to run the WD Spindown or Stop Utility. I'm working on a single activity app and there are many different things in each activity. I'm thinking about using Application domains. Is it good to create an application domain for each Activity in a single activity app? A: From my experiences, I don't think so. Application domains and the ApplicationContext is an essential part of Android framework, and using them requires a good understanding of it. Most of the times, I find that creating a separate AppDomain is overkill for the cases where ApplicationContext is already available and works, and simply creates complexity. Q: A

What's New in the?

* Protects your data by letting you control the spinning down of your WD external hard drive. * Spindown is an important function for WD external hard drives. You can turn off the drive for a variety of reasons and this utility will allow you to do so on a timed basis. It even remembers the last time you turned off the drive so that you can start and stop it at the same time next time. * This utility will stop, stop, stop and stop again on the external hard drive from 2 hours to an hour until the drive is fully off. * To turn the drive back on simply double-click the icon that is being used to stop the drive. * If the external hard drive is still spinning (aka only one light is lit) while being stopped, simply double click the icon to restart the external hard drive. * This utility works with all Western Digital external hard drives (except for the Media Center and the Dual-option Backup drives). * Keep in mind that when WD External drives spin down, the drive is powered off. There will not be any warning, beep, or any kind of noise. * To turn the drive back on simply double-click the icon that is being used to stop the drive. * If the external hard drive is still spinning (aka only one light is lit) while being stopped, simply double click the icon to restart the external hard drive. * This utility will stop, stop, stop and stop again on the external hard drive from 2 hours to an hour until the drive is fully off. * To turn the drive back on simply double-click the icon that is being used to stop the drive. WD Spindown or Stop Utility allows you to safely and reliably use your WD external hard drive on a timed basis. Features: * Spindown protection for your WD external hard drive. It is the only WD drive that will spindown! * Timed turn off for use when WD external drives are normally connected to your PC. It works like a timer and you can set it to come back on when it is safe to remove the drive from the PC. * It remembers the last time you turned off the external hard drive. * One click turn off and one click turn on. * Quickly comes back on from a stop. * Run with Administrator privileges. What's New in 1.7.9.1: * Added Windows 7, Vista and XP support. * Fixed compatibility with backup drives, and some old versions of the drive. For more information on this, visit: WD Spindown or Stop Utility is for use with all Western Digital external hard drives except for the Media Center and the Dual-option Backup drives. It is designed
