From the beginner level; assessment. Botany V1 with Answers. Botany questions for the most basic level; assessment. Free Online. From the beginner level; assessment. Botany V1 with Answers.Q: Serverless Framework - AWS RDS Access I'm trying to migrate my existing AWS RDS MySQL DB (and application) to Serverless. I created my DB in serverless.yml as: resources: Resources: myDatabase: Type: AWS::RDS::DBInstance Properties: DatabaseName: myDatabase

AllocatedStorage: 1 StorageType: GENERAL_2 But when i tried to deploy this.jar file to AWS Lambda, it fails to create the DATABASE. There are some aws errors occurring. D:\>service deploy Executing task: serverless.aws.app Installing.NET Core.1.0.2 Path: C:\WINDOWS\system32\config\SYSTEM Command: C:\Windows\system32\config\SYSTEM\bcdedit /set {default} legacyprotectedsettings 1 Result: To make your environment more secure, we recommend that you change the legacyprotectedsettings value to 0. 648931e174

£11 for the ability to ship in a crate, so no need to pay for post office delivery while their more expensive competitors offer free shipping. . More info : A: I am not quite sure what you mean by these links: "[...] should provide the answers along with the question. Books or any kind of information should be available for free so that students can refer back to it. online books aren't helpful for learning" "Please don't say that students should read books 'in a classroom'. You don't have a classroom, so there is no classroom here" ...and please note that the OP is asking about books that contain specific content. Yes, you can have books on a syllabus. However, providing a syllabus is a different matter. Reading materials are meant for the free mind, and not to teach someone else's course, because the same "free mind" can only appreciate one thing at a time. These manuals, in particular, are designed for reference at the point of need. In a genuine syllabus, we are talking about courses in which the Student is also supposed to learn from the material, but that's not the situation that the OP is describing. A: The problem with free information is that it is a massive time-waster. The first problem is that the user is not learning anything new. They are just absorbing external information. When I am studying something new I have to learn it. The second problem is that external information is not transferable. If a question is asked, it is very unlikely that it has a blank answer. Further, books are generally written for an audience that already knows the material. Finally, books are a waste of time and money. An equally good idea to read a book is to read someone's solution to a problem. A: I am one of those people that say that you should learn in the classroom and not outside of it. But at the same time, and not everyone follows this suggestion, to a large extent it's common sense that most of the time you will be learning outside of the classroom. So I would recommend you
