AutoLisp in AutoCAD 2023 AutoLisp was introduced in AutoCAD 2018 to ease your workflow by letting you use a text editor, instead of the proprietary native application, to do regular operations such as renaming, updating, or inserting in the current drawing. You can automate your existing text editing tasks, so you don't have to switch applications and re-format your text each time. In AutoCAD 2023, AutoLisp is further enhanced by incorporating with .NET Core and enables you to write natively with the newest capabilities of .NET Core: 1. Native support for Windows Forms and WPF for rich user interfaces in AutoLisp 2. Native support for XML, JSON, and any other .NET serialized type for sharing data with AutoLisp 3. Native support for optional UTF16TextEncoding for working with characters outside of the range 0 to 255 4. Native support for background processing using the TPL or Task Parallel Library for asynchronous operations For more details on what's new in AutoCAD 2023, check out the AutoCAD blog and the Learning AutoCAD 2023 User's Guide. What's new in Drawing: Drawing: Working with Profiles Are you trying to make a specific drawing element repeat itself throughout a drawing project? Profiles are a great way to do this, and they're available to you right out of the box! With profiles, you can specify common parts of the drawing, such as a door opening, and include them in the drawing without re-drawing them each time you make changes. Now, you can easily add new parts to a profile, and see the changes throughout your project without having to re-enter data.
